## SUMMARY

I am a BSc CSIT student with a strong passion for UI/UX design and creating intuitive, user-centered digital experiences. I have hands-on experience using Figma to design clean and modern interfaces, along with a basic understanding of HTML and CSS. I have also worked on projects using React and Next.js, which helps me bridge the gap between design and development. I am eager to apply my skills in real-world projects, grow, learn and contribute as a UI/UX designer.

## PROJECTS & DESIGN

**Nexora Biopharma Design** **[nexora.design](#)**

- Created an interface bridging the gap between cutting-edge medical research and public accessibility.

**Gocart** **[gocart.com](#)**

- A modern, robust e-commerce experience designed to delight shoppers and empower vendors with premium gadgets and smart accessories.

**Color Harmony Generator** **[colorharmony.com](#)**

- A fast, elegant web application for generating beautiful and precise color harmony palettes from a single base color. No signups, no external APIs, just instantly shareable palettes.

**Fake Review Detection System** **[fakrereviewdetect.com](#)**

- A machine learning-based system that analyzes user reviews to identify and classify fake or misleading content using NLP and machine learning.
-
